No part of this publication may be reproduced, transmitted, transcribed, stored in a retrieval system, or translated into any language or computer language, in any form or by any means, electronic, mechanical, magnetic, optical, chemical, manual or otherwise, without the prior written permission of Acer Incorporated.

Disclaimer

The information in this guide is subject to change without notice.

Acer Incorporated makes no representations or warranties, either expressed or implied, with respect to the contents hereof and specifically disclaims any warranties of merchantability or fitness for any particular purpose. Any Acer Incorporated software described in this manual is sold or licensed "as is". Should the programs prove defective following their purchase, the buyer (and not Acer Incorporated, its distributor, or its dealer) assumes the entire cost of all necessary servicing, repair, and any incidental or consequential damages resulting from any defect in the software.

Acer is a registered trademark of Acer Corporation.

AMD, the AMD Arrow logo, AMD Athlon, AMD Phenom, AMD Sempron, and combinations thereof, are trademarks of Advanced Micro Devices Inc.

Other brand and product names are trademarks and/or registered trademarks of their respective holders.

Conventions

The following conventions are used in this manual:

SCREEN MESSAGES	Denotes actual messages that appear on screen.
NOTE	Gives additional information related to the current topic.
WARNING	Alerts you to any physical risk or system damage that might result from doing or not doing specific actions.
CAUTION	Gives precautionary measures to avoid possible hardware or software problems.
IMPORTANT	Reminds you to do specific actions relevant to the accomplishment of procedures.

Service Guide Coverage

This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.

FRU Information

Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

System Tour

Features

Below is a brief summary of the computer's many feature:

NOTE: The features listed in this section is for your reference only. The exact configuration of the server depends on the model purchased.

Processor

- AMD Athlon LE-1600/1620/1640 processor
- AMD Athlon X2 Dual-Core BE-2300/2350/2400 or 4200+/4400+/4800+/5000+/5200+/5600+ processor
- AMD Phenom X3 Triple-Core 8400/8450/8600/8650 processor
- AMD Phenom X4 Quad-Core 9100e/9150e/9500/9550/9600/9650 processor
- AMD Sempron LE-1250/1300 or 2100 processor

Processor (for Eup)

- AMD Athlon LE-1640/1660 processor
- AMD Athlon 2650e AM2+ processor
- AMD Athlon X2 Dual-Core 2240/2245/2250 processor
- AMD Athlon X3 Triple-Core 3400e/3405e
- AMD Athlon X4 Quad-Core 4600e/4605e
- AMD Phenom X2 Dual-Core 545/550 processor
- AMD Phenom X3 Triple-Core 700e/705e/710/720/740 processor
- AMD Phenom X4 Quad-Core 805/810/820/900e/905e/910/925/945 processor
- AMD Sempron LE-1250/1300 or Sempron Dual Core 2200/2300 processor

Chipset

- NVIDIA nForce MCP78

Memory subsystem

- Supports up to two DDR2-667 registered ECC modules

Media storage

- DVD-ROM SATA drive
- Super-Multi SATA DVD drive
- 160 GB SATA hard disk drive

Serial ATA controller

- Embedded SATA2 controller
- Two SATA ports

Networking

- One Gigabit Ethernet LAN port (RJ-45)

PCI I/O

- One PCI Express x16 bus slot
- One PCI Express x1 bus slot

I/O ports

- Front
 - Three USB 2.0 ports
 - Memory Stick
 - Memory Stick PRO
 - Secure Digital (SD) Card
 - miniSD Card
 - Headphone/speaker-out/line-out jack
 - Microphone-in jack
 - CF/II (CompactFlash Type i/II) slot
 - IEEE 1394 port (4-pin)
- Rear
 - PS/2 keyboard port
 - PS/2 mouse port
 - Line-out jack
 - Microphone/speaker-out/line-in jack
 - Rear speaker/surround out jack
 - Center speaker/subwoofer jack
 - Line-in jack
 - S/PDIF port
 - Four USB 2.0 ports
 - eSATA port
 - CRT/LCD monitor port
 - HDMI port
 - Gigabit LAN ports
 - VGA/monitor port
 - Two USB 2.0 ports
 - Two Ethernet LAN ports (RJ-45)

Operating system and software

- Operating system options:
 - Genuine Windows Vista® Ultimate (32/64-bit)
 - Genuine Windows Vista Home Premium (32/64-bit)
- Applications
 - Acer Empowering Technology (Acer eRecovery Management)
 - Acer Arcade Live
 - McAfee Internet Security Suite 2008 Trial version
 - Adobe Reader
 - eSobi
 - NTI MediaMaker

Power supply

- 220-watts (115/230 Vac) power supply/220-watts (115/230 Vac) power supply Eup

Aspire X1300/X1301 Tour

This section is a virtual tour of the ASX1300 system's interior and exterior components.

Front Pane

Item	Icon	Component
B		Drive bay door
C		Drive bay door eject button Press to open drive bay door and access the optical drive.
D		Media card reader
E		USB 2.0 ports

Item	Icon	Component
F		Headphone/Speaker-out/line-out jack
G		Microphone-in jack
H		CF I/II (CompactFlash Type I/II) slot
I		IEEE 1394 port (4-pin)
J		Power/sleep button

Rear Panel

Item	Icon	Component
A		Expansion slot (Photo shows graphics card and network/modem card)
B		Line-out jack
C		Microphone/speaker-out/line-in jack
D	SPDIF	S/PDIF port
E		USB 2.0 ports
F	ESATA	eSATA port
G		CRT/LCD monitor port
H	HDMI	HDMI port
I		PS2 keyboard port
J		Power connector
K		Voltage selector switch
L		PS2 mouse port
M		Gigabit LAN port (10/100/1000 Mbps)
N		Rear speaker/surround out jack
O		Keyhole
P		Center speaker/subwoofer jack
Q		Line-in jack

Internal Components

Item	Component
A	Expansion card
B	Mainboard
C	Optical drive
D	Heat sink fan assembly
E	Power supply

System LED Indicators

This section describes the different system LED indicators.

LED indicator	Color	LED status	Description
Power 	Green	On	The system has AC power and is powered on.
	Green	Blinking	The system is in standby mode.
	—	Off	System is not powered on.
HDD activity 	Green	On	HDD is installed and functioning correctly.
	Green	Blinking	Ongoing HDD activity.
	Green/ Amber	Flashing	HDD is rebuilding data.
	Amber	On	HDD failure
LAN port network speed LED (left)	Amber	On	GbE link network access
	Green	On	100 Mbps link network access
	—	Off	10 Mbps link network access
LAN port network connection LED (right)	Green	On	Active network link
		Blinking	Ongoing network data activity
		Off	Off-line network

System Utilities

Phoenix BIOS Setup Utility

BIOS setup is a hardware configuration program built into the system's Basic Input/Output System (BIOS). Since most systems are already properly configured and optimized, there is no need to run this utility. You will need to run this utility under the following conditions.

- When changing the system configuration settings
- When redefining the communication ports to prevent any conflicts
- When modifying the power management configuration
- When changing the password or making other changes to the security setup
- When a configuration error is detected by the system and you are prompted ("Run Setup" message) to make changes to the BIOS setup

NOTE: If you repeatedly receive Run Setup messages, the battery may be bad. In this case, the system cannot retain configuration values in CMOS. Ask a qualified technician for assistance.

BIOS setup loads the configuration values in a battery-backed nonvolatile memory called CMOS RAM. This memory area is not part of the system RAM which allows configuration data to be retained when power is turned off.

Before you run the *Phoenix*BIOS Setup Utility, make sure that you have saved all open files. The system reboots immediately after you close the Setup.

NOTE: *Phoenix*BIOS Setup Utility will be simply referred to as "Setup" or "Setup utility" in this guide.

The screenshots used in this guide display default system values. These values may not be the same those found in your system.

Entering BIOS setup

1. Turn on the server and the monitor.

If the server is already turned on, close all open applications, then restart the server.

2. During POST, press **Delete**.

If you fail to press **Delete** before POST is completed, you will need to restart the server.

The Setup Main menu will be displayed showing the Setup's menu bar. Use the left and right arrow keys to move between selections on the menu bar.

Navigating Through the Setup Utility

Use the following keys to move around the Setup utility.

- **Left** and **Right** arrow keys – Move between selections on the menu bar.
- **Up** and **Down** arrow keys – Move the cursor to the field you want.
- **PgUp** and **PgDn** keys – Move the cursor to the previous and next page of a multiple page menu.
- **Home** – Move the cursor to the first page of a multiple page menu.
- **End** – Move the cursor to the last page of a multiple page menu.
- **+** and **-** keys – Select a value for the currently selected field (only if it is user-configurable). Press these keys repeatedly to display each possible entry, or the **Enter** key to choose from a pop-up menu.

NOTE: Grayed-out fields are not user-configurable.

- **Enter** key – Display a submenu screen.

NOTE: Availability of submenu screen is indicated by a (>).

- **Esc** – If you press this key:
 - q On one of the primary menu screens, the Exit menu displays.
 - q On a submenu screen, the previous screen displays.
 - q When you are making selections from a pop-up menu, closes the pop-up without making a selection.
- **F1** – Display the BIOS setup General Help panel.
- **F5** – Press to load previous default system values.
- **F6** – Press to load fail-safe default system values.
- **F7** – Press to load optimized default system values.
- **F10** – Save changes made the Setup and close the utility.

Setup Utility Menus

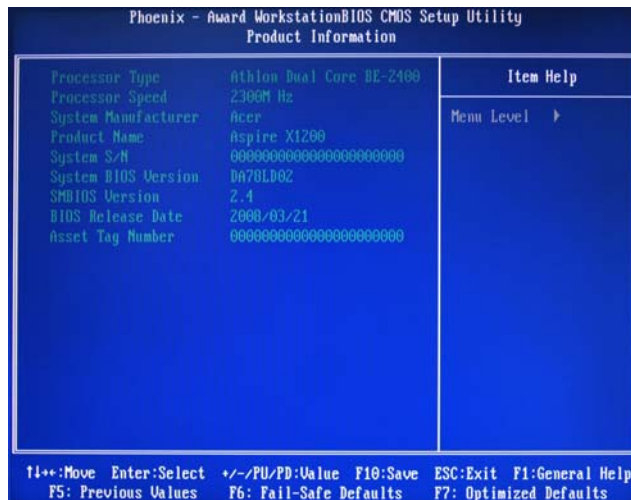

The tabs on the Setup menu bar correspond to the six primary BIOS Setup menus, namely:

- Product Information
- Standard CMOS Features
- Advanced BIOS Features
- Advanced Chipset Features
- Integrated Peripherals
- Power Management Setup
- PnP/PCI Configurations
- PC Health Status
- Load Default Settings
- Set Supervisor Password
- Set User Password
- Save & Exit Setup
- Exit Without Saving

In the descriptive table following each of the menu screenshots, settings in **boldface** are the default and suggested settings.

Product Information

The Product Information menu displays basic information about the system. These entries are for your reference only and are not user-configurable.

Standard CMOS Features

Parameter	Description	Option
Date	Set the date following the weekday-month-day-year format.	
Time	Set the system time following the hour-minute-second format.	
Halt On	Determines whether the system will stop for an error during the POST.	All, But Keyboard No Errors All Errors All, But Diskette All, But Disk/Key
Base Memory	Also called conventional memory. Typically, 640 KB will be reserved for the MS-DOS OS.	
Extended Memory	Total size of extended memory detected during POST	
Total Memory	Total size of system memory detected during POST	

Advanced BIOS Features

Parameter	Description	Option
CPU Feature	Press Enter to configure the CPU Virtualization and AMD K8 Cool and Quiet Control features.	
Hard Disk Boot Priority	Press Enter to select hard disk boot device priority.	
Virus Warning	Specifies the virus warning feature for IDE hard disk boot sector protection. If enabled, BIOS will show a warning message on the screen or an alarm beep when someone attempts to write data into this area.	Disabled Enabled
CPU Internal Cache	Enables or disables CPU internal cache.	Enabled Disabled
External Cache	Enables or disables internal cache.	Enabled Disabled
Quick Power On Self Test	Allows the system to skip certain test while booting. This will decrease the time needed to boot the system.	Enabled Disabled
First/Second/Third/Fourth Boot Device	Specifies the boot order from the available devices.	CDROM, Hard Disk, NVIDIA Boot Age, Floppy, ZIP, USB-FDD, USB-ZIP, USB-CDROM, USB-HDD, Legacy LAN, Disabled
Boot Up Floppy Seek	Enables or disables floppy drive testing to determine whether they have 40 to 80 tracks.	Disabled Enabled
Boot Up NumLock Status	Selects power on state for Num Lock.	On Off
Gate A20 Option	When set to fast, the motherboard chipset controls the operation of Gate A20. But when set to normal, a pin in the keyboard controller controls Gate A20.	Fast Normal
Typematic Rate Setting	When enabled, you can manually adjust the settings using the two typematic controls (Typematic Rate and Typematic Rate Delay). If disabled, the BIOS will use the default setting.	Disabled Enabled
Typematic Rate (Chars/Sec)	Rate at which the keyboard will repeat the keystroke if you press it continuously.	6, 8, 10, 12, 15, 20, 24, 30
Typematic Delay (MSec)	Delay, in Msec, before the keyboard automatically repeats the keystroke that you have pressed continuously.	250, 500, 750, 1000

Parameter	Description	Option
Security Option	When set to system, BIOS will ask for the password each time the system boots up. If set to setup, the password is only required for access into the BIOS setup menus.	Setup System
MPS Version Control For OS	Specifies the version of the Multiprocessor Specification (MPS) that the mainboard will use.	1.4 1.1
OS Select For DRAM > 64 MB	Select OS/2 if the system is running OS/2 operating system and the system memory is more than 64 MB in size.	Non-OS/2 OS/2
Full Screen Logo Show	Enables or disables the display of the full screen boot logo.	Enabled Disabled
Small Logo (EPA) Show	Enables or disables the display of the EPA logo.	Disabled Enabled

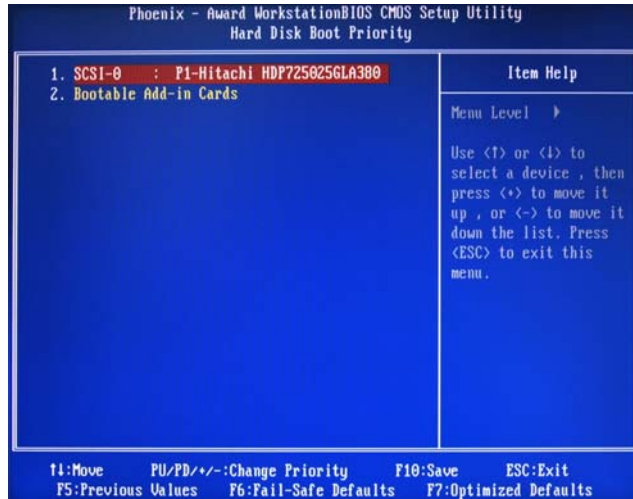

CPU Feature

Parameter	Description	Option
Virtualization	Select whether to enable or disable the AMD Virtualization Technology (VT) function. VT allows a single platform to run multiple operating systems in independent partitions.	Enabled Disabled
AMD K8 Cool&Quiet control	When set to auto, the AMD Cool'n'Quiet driver dynamically adjust the CPU clock and VIA to reduce heat output from your computer and its power consumption.	Disabled Auto

Hard Disk Boot Priority

The Hard Disk Boot Priority submenu allows you to specify the sequence of loading the OS from the installed hard drives. Use the up or down arrow key to select a hard drive, then press the <+> key or the <-> key to move it up or down on the list. |

Advanced Chipset Features

Parameter	Description	Option
Hyper SLI	Enable or disable the Scalable Link Interface (SLI) technology.	Disabled Enabled
iGPU Frame Buffer Control	When set to auto, BIOS will automatically setup the frame buffer size. When set to manual, you can set the frame buffer size. Frame buffer size is the total amount of system memory allocated solely for the onboard graphics controller.	Auto Manual
Frame Buffer Size	This parameter can be configured if the iGPU Frame Buffer Control is set to Manual.	64 , 16, 32, 128, 256 MB
CPU Frequency	Sets processor minimum and maximum frequency.	200 Minimum 100 Maximum 500
KB->NB HT Speed	Controls the physical speed of the processor to the Northbridge HT link.	Auto 200, 400, 600, 800 MHz, 1 GHz
KB->NB HT Width	Controls the processor to the Northbridge link bandwidth.	Auto Up 8/16 Down 8/16
PCIE Clock	Sets the PCI Express clock frequency.	100 Minimum 100 Maximum 200
DRAM Configuration	Press Enter to configure memory timing and operation settings.	
CPU Spread Spectrum	Allows you to reduce the EMI of the front side bus by modulating the signals it generates so that the spikes are reduced to flatter curves.	Disabled -0.5%, 1.0%
PCIE Spread Spectrum	Allows you to reduce the EMI of the PCI Express bus by modulating the signals it generates so that the spikes are reduced to flatter curves. When set to down spread, the chipset modulates the PCI Express bus' baseline signal downwards by a small amount. When set to disabled, the chipset disables any modulation of the PCI Express bus' baseline signal.	Disabled Down Spread
SATA Spread Spectrum	Allows you to reduce the EMI of the SATA bus by modulating the signals it generates so that the spikes are reduced to flatter curves. When set to down spread, the chipset modulates the SATA bus' baseline signal downwards by a small amount. When set to disabled, the chipset disables any modulation of the SATA bus' baseline signal.	Disabled Down Spread

Parameter	Description	Option
iGPU Spread Spectrum	Allows you to set the integrated GPU spread spectrum.	50 Triangular Cntr 100/200/300 Triangular Cntr
SSE/SSE2 Instructions	Enables or disables the processor's SSE and SSE2 instruction sets.	Enabled Disabled
MCP78 PCIE Training	Cards supporting Gen2 mode will be trained in Gen2 mode.	Gen2 if supported Only Gen1
System BIOS cacheable	Enables or disables the caching of the mainboard BIOS ROM from F0000h to FFFFFh by the processor's Level 2 cache.	Disabled Enabled

DRAM Configuration

Parameter	Description	Option
Timing Mode	When set to auto mode, the system reads the electronic data sheet of the memory modules and adjusts the timings accordingly. When set to MaxMemClk, you can manually specify the memory clock frequency independent of the system bus frequency.	Auto MaxMemClk
Memory Clock value or Limit	Displays the current memory clock frequency.	
CKE base power down mode	All synchronous memory devices can go into sleep mode as soon as the clock enable (CKE) signal is disasserted. In that case, the internal clocks are disabled and the memory chip goes into auto-refresh mode which is the lowest power state at which the memory retains data. If then power is turned off, the device will lose all data, however, as long as standby power is maintained, no data loss will occur.	Disabled Enabled
CKE based power down	Sets the CKE power saving through disasserting clock enable using system level or per channel basis.	Per Channel Per CS
Memclock tri-stating	Enables or disables the memory clock tri-stating during C3 an Alt VD feature.	Disabled Memclock tri-stating during C3 and Alt VD
Memory Hole Remapping	Enables or disables memory remapping around the memory hole.	Enabled Disabled
Auto Optimize Bottom IO	Allows you to auto optimize maximal memory size when kernel assigns PCI Resources.	Enabled Disabled
Bottom of UMA DRAM [31:24] [FC]	Allows you to enter a HEX number ranging from 0000 to 00F0.	Minimim 0000 Maximum 00FC

Integrated Peripherals

Parameter	Description	Option
IDE Function Setup	Press Enter to access the IDE Function Setup submenu.	
MCP Storage Config	Press Enter to access the MCP Storage Config submenu.	
Init Display First	Select whether to boot the system using the AGP graphic card or a PCI card installed on the PCI Express slot or PCI slot.	PCIEx PCI Slot Onboard
HD Audio	Enables or disables the onboard audio controller.	Auto Disabled
HDMI Audio	Allows you to control the audio function of the onboard HDMI.	Disabled Auto
MAC LAN	Enables or disables the built-in network interface card.	Auto Disabled
IDE HDD Block Mode	When enabled, the BIOS will automatically detect if your hard disk supports block transfers and set the proper block transfer settings for it. Depending on the IDE controller, up to 64 KB of data can be transferred per interrupt when block transfers are enabled. When disabled, only 512 bytes of data can be transferred per interrupt.	Enabled Disabled
Onboard Serial Port 1	Select the I/O address and IRQ for the first serial port.	3F8/IRQ4 2F8/IRQ3 3E8/IRQ4 2E8/IRQ3 Auto Disabled
Onboard Parallel Port	Select the I/O address and IRQ for the onboard parallel port.	378/IRQ7 278/IRQ5 3BC/IRQ7 Disabled
Parallel Port Mode	Select an operating mode for the onboard parallel port.	SPP EPP ECP ECP+EPP
ECP Mode Use DMA	Select DMA channel for the LPT port in ECP mode. This parameter can be configured if the parallel port mode is set to ECP or ECP +EPP mode.	3 1
USB Device Setting	Press Enter to access the USB Device Setting submenu.	

IDE Function Setup

Parameter	Description	Option
OnChip IDE Channel 0	Enables or disables the first IDE channel.	Enabled Disabled
Primary Master PIO	When set to Auto, BIOS setup automatically detects if the installed hard disk supports the function. If supported, it allows for faster data recovery and read/write timing that reduces hard disk activity time. This results in better hard disk performance. Mode 0 to 4 provide progressive increase of performance.	Auto Mode 0 Mode 1 Mode 2 Mode 3 Mode 4
Primary Slave PIO		Auto Mode 0 Mode 1 Mode 2 Mode 3 Mode 4
Primary Master UDMA	Enables or disables the primary and master UDMA mode	Auto Disabled
Primary Slave UDMA		Auto Disabled
IDE DMA Transfer	Enables or disables DMA (Direct Memory Access) transfers for all IDE drives.	Enabled Disabled
Serial-ATA Controller	Enables or disables the serial ATA controller.	Enabled Disabled
IDE Prefetch Mode	Enables or disables the IDE controller to prefetch data from the IDE drive.	Enabled Disabled

MCP Storage Config

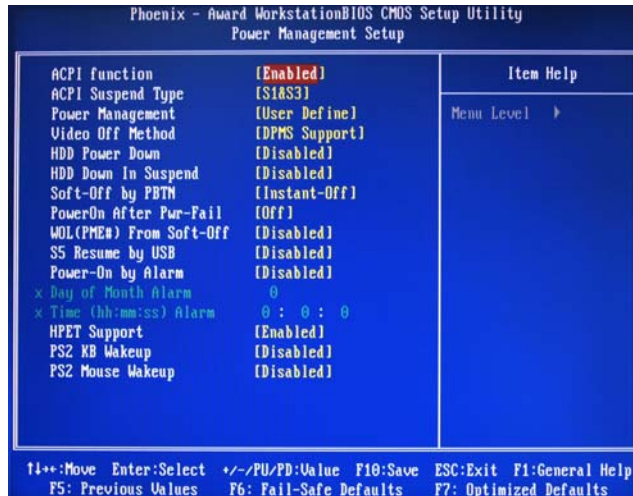

Parameter	Description	Option
SATA Operation Mode	Select a SATA operation mode.	AHCI IDE RAID Linux AHCI
SATA 0 -- Port 1 ~ 6	Enables or disables the SATA RAID on ports 1 to 6. This parameter can be configured if the SATA Operation Mode is set to RAID	Disabled Enabled
SATA SALP Feature	Select a Supports Aggressive Link Power Management (SALP) feature.	Off Partial Slumber

USB Device Setting

Parameter	Description	Option
USB 1.0 Controller	Enables or disables the onboard USB controller.	Enabled Disabled
USB 2.0 Controller		Enabled Disabled
USB Operation Mode	Select a USB device operation speed.	High Speed Full Low Speed
USB Keyboard Function	Enables or disables legacy support of the USB keyboard.	Enabled Disabled
USB Mouse Function	Enables or disables legacy support of the USB mouse.	Enabled Disabled
USB Storage Function	Enables or disables legacy support of the USB storage device.	Enabled Disabled

Power Management Setup

Parameter	Description	Option
ACPI function	Enables or disables the Advanced Configuration and Power Management (ACPI) function.	Enabled Disabled
ACPI Suspend Type	Select an ACPI state.	S1 & S3 S1 (POS) S3 (STR)
Power Management	Select a power saving method for the following modes: <ul style="list-style-type: none"> HDD power down Suspend mode 	User Define Min. Saving Max Saving
Video Off Method	Determines the manner when the monitor goes blank.	DPMS Support Blank Screen V/H Sync + Blank
HDD Power Down	Set a time when the hard disk drives will power down after a period inactivity.	Disabled 1 to 14 Min
HDD Down in Suspend	Enables or disables the HDD power down function in suspend mode.	Disabled Enabled
Soft-Off by PBTN	Determines the behavior of system power button.	Instant-Off Delay 4 Sec
PowerOn After Pwr-Fail	Set the system to automatically start itself up after a power failure.	Off On Former-Sts
WOL (PME#)/From Soft-Off	Enables or disables to wake up the system from a power saving mode through an event on a LAN device or using soft-off.	Disabled Enabled
S5 Resume by USB	If enabled, press any key or click the mouse will wake system from S1/S3 state.	Disabled Enabled
Power-On by Alarm	Enables or disables to boot the system on scheduled date/time.	Disabled Enabled
Day of Month Alarm	This parameter can be configured if the Power-On by Alarm is set to enable.	
Time (hh:mm:ss) Alarm		
HPET Support	Enables or disables the High Precision Event Timer (HPET) function.	Enabled Disabled
PS2 KB Wakeup	Enables or disables to wake up the system from a power saving mode using a PS2 keyboard.	Disabled Enabled
PS2 Mouse Wakeup	Enables or disables to wake up the system from a power saving mode using a PS2 mouse.	Disabled Enabled

Power Management Setup (Eup)

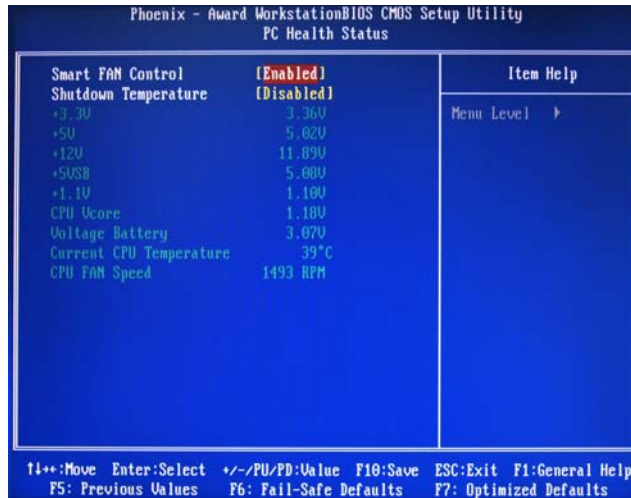

Parameter	Description	Option
ACPI function	Enables or disables the Advanced Configuration and Power Management (ACPI) function.	Enabled Disabled
ACPI Suspend Type	Select an ACPI state.	S1 & S3 S1 (POS) S3 (STR)
Power Management	Select a power saving method for the following modes: <ul style="list-style-type: none"> HDD power down Suspend mode 	User Define Min. Saving Max Saving
Video Off Method	Determines the manner when the monitor goes blank.	DPMS Support Blank Screen V/H Sync + Blank
HDD Power Down	Set a time when the hard disk drives will power down after a period inactivity.	Disabled 1 to 14 Min
HDD Down in Suspend	Enables or disables the HDD power down function in suspend mode.	Disabled Enabled
Soft-Off by PBTN	Determines the behavior of system power button.	Instant-Off Delay 4 Sec
PowerOn After Pwr-Fail	Set the system to automatically start itself up after a power failure.	Off On Former-Sts
WOL (PME#)/From Soft-Off	Enables or disables to wake up the system from a power saving mode through an event on a LAN device or using soft-off.	Disabled Enabled
S5 Resume by USB	If enabled, press any key or click the mouse will wake system from S1/S3 state.	Disabled Enabled
Power-On by Alarm	Enables or disables to boot the system on scheduled date/time.	Disabled Enabled
Day of Month Alarm	This parameter can be configured if the Power-On by Alarm is set to enable.	
Time (hh:mm:ss) Alarm		
HPET Support	Enables or disables the High Precision Event Timer (HPET) function.	Enabled Disabled
PS2 KB Wakeup	Enables or disables to wake up the system from a power saving mode using a PS2 keyboard.	Disabled Enabled
PS2 Mouse Wakeup	Enables or disables to wake up the system from a power saving mode using a PS2 mouse.	Disabled Enabled

PnP/PCI Configurations

Parameter	Description	Option
Reset Configuration Data	If enabled, the system is forced to update Extended System Configuration Data (ESCD) and then is automatically set to the disabled mode. If disabled, the system ESCD will update only when the new configuration varies from the last one.	Disabled Enabled
Resources Controlled By	When set to auto ESCD, the system BIOS will detect the system resources and automatically assign the relative IRQ and DMA channel for each peripheral. When set to manual, you have to assign the IRQ and DMA for add-on cards.	Auto ESCD Manual
IRQ Resources	This parameter can be configured if the Resources Controlled By is set to Manual. It allows you to assign each system interrupt a type, depending on the type of device using the interrupt.	IRQ-5 IRQ-7, IRQ-9, IRQ-10, IRQ-11, IRQ-14
PCI/VGA Palette Snoop	Enables or disables the system graphic card to allow VGA palette snooping.	Disabled Enabled
Maximum Payload Size	Set the maximum payload size for Transaction packets (TLP).	4096 128, 256, 512, 1024 2048

PC Health Status

Parameter	Description	Option
Smart FAN Control	Enables or disables the smart system fan control function.	Enabled Disabled
Shutdown Temperature	Set the CPU shutdown temperature.	Disabled 60° C/140° F 65° C/149° F 70° C/158° F

Load Default Settings

The Load Default Settings menu allows you to load the default settings for all BIOS setup parameters. Setup defaults are quite demanding in terms of resources consumption. If you are using low-speed memory chips or other kinds of low-performance components and you choose to load these settings, the system might not function properly.

Set Supervisor Password

The Set Supervisor Password menu allows you to set a supervisor password. The supervisor password allows you to access and change all settings in the Setup Utility.

Setting a supervisor password

1. Use the up/down arrow keys to select Set Supervisor Password menu then press **Enter**.
A password box will appear.
2. Type a password then press **Enter**.
The password may consist up to six alphanumeric characters (A-Z, a-z, 0-9)
3. Retype the password to verify the first entry then press **Enter** again.
4. Press **F10**.
5. Select **Yes** to save the new password and close the Setup Utility.

Changing the supervisor password

1. Use the up/down arrow keys to select Set Supervisor Password menu then press **Enter**.
2. Type the original password then press **Enter**.
3. Type a new password then press **Enter**.
4. Retype the password to verify the first entry then press **Enter** again.
5. Press **F10**.
6. Select **Yes** to save the new password and close the Setup Utility.

Removing a supervisor password

1. Use the up/down arrow keys to select Set Supervisor Password menu then press **Enter**.
2. Enter the current password then press **Enter**.
3. Press **Enter** twice without entering anything in the password fields.

Set User Password

The Set User Password menu allows you to set a user password. Entering this password will restrict a user's access to the Setup menus. A supervisor password must be set first before you can enable or disable this field. A user can only access and modify the system time, system date, and set user password.

Setting a user password

1. Use the up/down arrow keys to select Set User Password menu then press **Enter**.
A password box will appear.
2. Type a password then press **Enter**.
The password may consist up to six alphanumeric characters (A-Z, a-z, 0-9)
3. Retype the password to verify the first entry then press **Enter** again.
4. Press **F10**.
5. Select **Yes** to save the new password and close the Setup Utility.

Changing the user password

1. Use the up/down arrow keys to select Set User Password menu then press **Enter**.
2. Type the original password then press **Enter**.
3. Type a new password then press **Enter**.
4. Retype the password to verify the first entry then press **Enter** again.
5. Press **F10**.
6. Select **Yes** to save the new password and close the Setup Utility.

Removing a user password

1. Use the up/down arrow keys to select Set User Password menu then press **Enter**.
2. Enter the current password then press **Enter**.
3. Press **Enter** twice without entering anything in the password fields.

Save & Exit Setup

The Save & Exit Setup menu allows you to save changes made and close the Setup Utility.

Exit Without Saving

The Exit Without Saving menu allows you to discard changes made and close the Setup Utility.

System Disassembly

This chapter contains step-by-step procedures on how to disassemble the desktop computer for maintenance and troubleshooting.

Disassembly Requirements

To disassemble the computer, you need the following tools:

- Wrist grounding strap and conductive mat for preventing electrostatic discharge
- Flat-blade screwdriver
- Philips screwdriver
- Hex screwdriver
- Plastic flat-blade screwdriver
- Plastic tweezers

NOTE: The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components.

Pre-disassembly Procedure

Before proceeding with the disassembly procedure, perform the steps listed below:

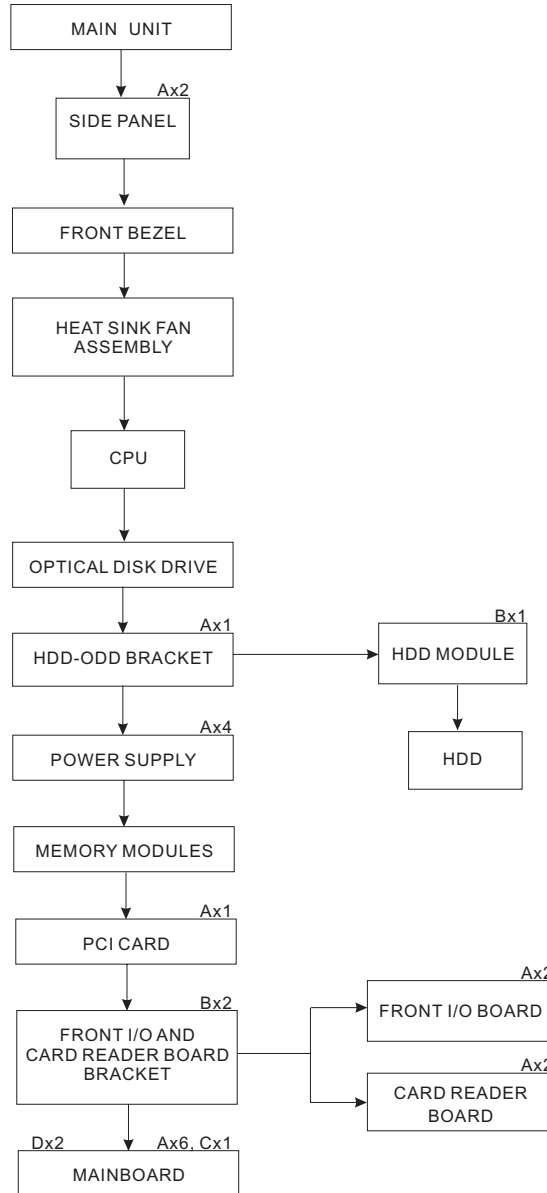

1. Turn off the system and all the peripherals connected to it.
2. Unplug the power cord from the power outlets.
3. Unplug the power cord from the system.
4. Unplug all peripheral cables from the system.
5. Place the system unit on a flat, stable surface.

Main Unit Disassembly

External Modules Disassembly Flowchart

The flowchart below gives you a graphic representation on the entire disassembly sequence and instructs you on the components that need to be removed during servicing.

MAIN UNIT DISASSEMBLY

Screw List

	Screw	Part No.
A	#6-32 L5 BZN	86.00J07.B60
B	#6-32*3/16 NI	86.5A5B6.012
C	M3xL5 BZN	86.1A324.5R0
D	Hex screw	N/A

Removing the Side Panel

1. Perform the pre-disassembly procedure described on page 34.
2. Remove the screw (A) located on the rear edge of the side panel.

Screw (Quantity)	Color	Torque	Part No.
#6-32 L5 BZN (2)	Black	5.5 to 6.5 kgf-cm	86.00J07.B60

3. Slide the side panel toward the back of the chassis until the tabs on the cover disengage with the slots on the chassis.
4. Lift the side panel away from the server and put it aside for reinstallation later.

Removing the Front Bezel

1. Remove the side panel. Refer to the previous section for instructions.
2. Release the front bezel retention tab from the chassis interior.
3. Pull the bezel away from the chassis.

Removing the Heat Sink Fan Assembly

WARNING: The heat sink becomes very hot when the system is on. NEVER touch the heat sink with any metal or with your hands.

1. See “Removing the Side Panel” on page 36.
2. See “Removing the Front Bezel” on page 37.
3. Use a long-nosed screwdriver to loosen the four screws on the heat sink, in the order as shown below.

4. Lift the heat sink fan assembly away from the mainboard.

5. Disconnect the fan cable from the mainboard.

6. Lay down the heat sink fan assembly in an upright position—with the thermal patch facing upward. Do not let the thermal patch touch the work surface.
7. Use an alcohol pad to wipe off the thermal grease from both the heat sink and the processor socket retention plate.

Removing the Processor

IMPORTANT: Before removing a processor from the mainboard, make sure to create a backup file of all important data.

WARNING: The processor becomes very hot when the system is on. Allow it to cool off first before handling.

1. See “Removing the Side Panel” on page 36.
2. See “Removing the Front Bezel” on page 37.
3. See “Removing the Heat Sink Fan Assembly” on page 38.
4. Release the load lever.

5. Pull the load lever to the fully open, upright position.

6. Pull out the processor from the socket.

IMPORTANT: If you are going to install a new processor, note the arrow on the corner to make sure the processor is properly oriented over the socket.

Removing the Optical Drive

1. See “Removing the Side Panel” on page 36.
2. See “Removing the Front Bezel” on page 37.
3. See “Removing the Heat Sink Fan Assembly” on page 38.
4. See “Removing the Processor” on page 40.
5. Disconnect the data and power cables from the rear of the optical drive and the mainboard.

6. Release the drive bay retention release lever.

7. Pull the lever to the fully open position, as shown below.

8. Pull the drive out of the drive bay.

Removing the Hard Disk Drive

- 1. See “Removing the Side Panel” on page 36.
- 2. See “Removing the Front Bezel” on page 37.
- 3. See “Removing the Heat Sink Fan Assembly” on page 38.
- 4. See “Removing the Processor” on page 40.
- 5. See “Removing the Optical Drive” on page 42.
- 6. Remove the HDD-ODD bracket.
 - a. Remove the screw (A) that secures the HDD bracket to the chassis.

Screw (Quantity)	Color	Torque	Part No.
#6-32 L5 BZN (1)	Black	5.5 to 6.5 kgf-cm	86.00J07.B60

-
- b. Lift the bracket out of the chassis.

7. Disconnect the data cable from the mainboard.

-
8. Disconnect the data cable from the rear of the hard drive.

9. Disconnect the power cable from the rear of the hard drive.

10. Place the bracket on a clean, static-free work surface.

11. Remove the HDD module.

- a. Remove the four screws (B) that secures the HDD module to the HDD bracket.

Screw (Quantity)	Color	Torque	Part No.
#6-32*3/16 NI (4)	Silver	5.5 to 6.5 kgf-cm	86.5A5B6.012

- b. Slide the HDD out of the bracket.

Removing the Power Supply

1. See “Removing the Side Panel” on page 36.
2. See “Removing the Front Bezel” on page 37.
3. See “Removing the Heat Sink Fan Assembly” on page 38.
4. See “Removing the Processor” on page 40.
5. See “Removing the Optical Drive” on page 42.
6. See “Removing the Hard Disk Drive” on page 44.
7. Disconnect the 8-pin power supply cable from the mainboard.

8. Disconnect the 24-pin power supply cable from the mainboard.

9. Remove the screw (A) that secures the power supply to the chassis.

Screw (Quantity)	Color	Torque	Part No.
#6-32 L5 BZN (1)	Black	5.5 to 6.5 kgf-cm	86.00J07.B60

10. Remove the three screws (A) that secure the power supply to the rear panel.

Screw (Quantity)	Color	Torque	Part No.
#6-32 L5 BZN (3)	Black	5.5 to 6.5 kgf-cm	86.00J07.B60

11. Lift the power supply module out of the chassis.

Removing the Memory Modules

IMPORTANT: Before removing any DIMM from the memory board, make sure to create a backup file of all important data.

1. See “Removing the Side Panel” on page 36.
2. See “Removing the Front Bezel” on page 37.
3. See “Removing the Heat Sink Fan Assembly” on page 38.
4. See “Removing the Processor” on page 40.
5. See “Removing the Optical Drive” on page 42.
6. See “Removing the Hard Disk Drive” on page 44.
7. Press the holding clips on both sides of the DIMM slot outward to release the DIMM.

8. Gently pull the DIMM upward to pull it away from the chassis.

Removing the PCI Card

1. See “Removing the Side Panel” on page 36.
2. See “Removing the Front Bezel” on page 37.
3. See “Removing the Heat Sink Fan Assembly” on page 38.
4. See “Removing the Processor” on page 40.
5. See “Removing the Optical Drive” on page 42.
6. See “Removing the Hard Disk Drive” on page 44.
7. Remove the screw (A) that secures the card to the chassis.

Screw (Quantity)	Color	Torque	Part No.
#6-32 L5 BZN (1)	Black	5.5 to 6.5 kgf-cm	86.00J07.B60

8. Gently pull the card to remove it from the mainboard.

Removing the Front I/O and Card Reader Boards

1. See “Removing the Side Panel” on page 36.
2. See “Removing the Front Bezel” on page 37.
3. See “Removing the Heat Sink Fan Assembly” on page 38.
4. See “Removing the Processor” on page 40.
5. See “Removing the Optical Drive” on page 42.
6. See “Removing the Hard Disk Drive” on page 44.
7. See “Removing the Memory Modules” on page 51.
8. Disconnect one end of the three USB (1, 2, and 4), audio (2), and 1394 (5) cables from the rear of the I/O and card reader boards.

9. Disconnect the other end of the cables from the mainboard.

10. Remove the front I/O and card reader board bracket.

a. Remove the two screws (B) that secures the bracket to the chassis.

Screw (Quantity)	Color	Torque	Part No.
#6-32*3/16 NI (2)	Silver	5.5 to 6.5 kgf-cm	86.5A5B6.012

- b. Push the bracket inward, then remove the bracket from the chassis.

11. Remove the card reader board.

- a. Remove the two screws (A) that secure the card reader board to the bracket.

Screw (Quantity)	Color	Torque	Part No.
#6-32 L5 BZN (2)	Black	5.5 to 6.5 kgf-cm	86.00J07.B60

- b. Pull the card reader board out of the bracket.

12. Remove the front I/O board.

- a. Remove the two screws (A) that secure the I/O board to the bracket.

Screw (Quantity)	Color	Torque	Part No.
#6-32 L5 BZN (2)	Black	5.5 to 6.5 kgf-cm	86.00J07.B60

- b. Pull the I/O board out of the bracket.

Removing the Mainboard

1. See “Removing the Side Panel” on page 36.
2. See “Removing the Front Bezel” on page 37.
3. See “Removing the Heat Sink Fan Assembly” on page 38.
4. See “Removing the Processor” on page 40.
5. See “Removing the Optical Drive” on page 42.
6. See “Removing the Hard Disk Drive” on page 44.
7. See “Removing the Memory Modules” on page 51.
8. See “Removing the PCI Card” on page 53.
9. See “Removing the Front I/O and Card Reader Boards” on page 55.
10. Disconnect the LED cable from the mainboard.

11. Remove the three screws (C, D) from the rear panel.

Screw (Quantity)	Color	Torque	Part No.
M3xL5 BZN (1)	Black	5.5 to 6.5 kgf-cm	86.1A324.5R0
Hex screw (2)	Silver	N/A	N/A

12. Remove the six screws (A) that secures the mainboard to the chassis, in the order shown.

Screw (Quantity)	Color	Torque	Part No.
#6-32 L5 BZN (6)	Black	5.5 to 6.5 kgf-cm	86.00J07.B60

13. Lift the board from the chassis.

System Troubleshooting

This chapter provides instructions on how to troubleshoot system hardware problems.

Hardware Diagnostic Procedure

IMPORTANT: The diagnostic tests described in this chapter are only intended to test Acer products. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.

1. Obtain the failing symptoms in as much detail as possible.
2. Verify the symptoms by attempting to recreate the failure by running the diagnostic tests or repeating the same operation.
3. Refer to the table below to determine which corrective action to perform.

Problem	Symptom	Section to Refer to
Power failure	The power indicator does not light up or stay lit.	"Power System Check" on page 62
POST failure	POST does not complete. No beep or error codes issued.	"POST Error and Beep Codes" on page 63.
	POST detects an error and displayed messages on screen.	

System Check Procedures

Power System Check

If the system will power on, skip this section. Refer to System External Inspection.

If the system will not power on, do the following:

- q Check if the power cable is properly connected to the system and AC source.
- q Check if the voltage selector switch is set to the correct voltage setting.

System External Inspection

1. Inspect the LED indicators on the front panel, which can indicate the malfunction. For the LED locations and description of their behaviour, see “System LED Indicators” on page 7.
2. Make sure that air flow is not blocked.
3. Make sure nothing in the system is making contact that could short out power.
4. If the problem is not evident, continue with System Internal Inspection.

System Internal Inspection

1. Turn off the system and all the peripherals connected to it.
2. Unplug the power cord from the power outlets.
3. Unplug the power cord from the system.
4. Unplug all peripheral cables from the system.
5. Place the system unit on a flat, stable surface.
6. Remove the system covers.
7. Verify that components are properly seated.
8. Verify that all cable connectors inside the system are firmly and correctly attached to their appropriate connectors.
9. Verify that all components are Acer-qualified and supported.
10. Replace the system covers.
11. Power on the system.
12. If the problem with the system is not evident, you can try viewing the POST messages and BIOS event logs during the system startup.

POST Error and Beep Codes

NOTE: Perform the FRU replacement or actions in the sequence shown in FRU/Action column, if the FRU replacement does not solve the problem, put the original part back in the computer. Do not replace a non-defective FRU.

The error messages in the following table indicate the BIOS signals on the screen and the error symptoms classified by functions. If the symptom is not included on the list, please refer to “Undetermined Problems”.

NOTE: Most of the error messages occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured.

NOTE: If the system fails after you make changes in the BIOS Setup Utility menus, reset the computer, enter Setup and install Setup defaults or correct the error.

POST Code (Hex)	POST Routine Description
CFh	Test CMOS R/W functionality
C0h	Early chipset initialization q Disable shadow RAM q Disable L2 cache (socket 7 or below) q Program basic chipset registers
C1h	Detect memory q Auto-detection of DRAM size, type, and ECC q Auto-detection of L2 cache (socket 7 or below)
C3h	Expand compressed BIOS code to DRAM
C5h	Call chipset hook to copy BIOS back to E000 and F000 shadow RAM
01h	Expand the X group codes locating in physical address 1000:0
02h	Reserved
03h	Initial Superio_Earl_Init switch
04h	Reserved
05h	1 Blank out screen 2 Clear CMOS error flag
06h	Reserved
07h	1 Clear 8042 interface 2 Initialize 8042 self-test
08h	1 Test special keyboard controller for Winbond 977 series Super I/O chips 2 Enabled keyboard interface
09h	Reserved
0Ah	1 Disable PS/2 mouse interface (optional) 2 Auto detect ports for keyboard and mouse followed by a port and interface swap (optional) 3 Reset keyboard for Winbond 977 series Super I/O chops
0Bh	Reserved
0Ch	Reserved
0Dh	Reserved
0Eh	Test F000h segment shadow to see whether it is rewritable or not. If test fails, keep beeping the speaker.
0Fh	Reserved
10h	Auto detect flash type to load appropriate flash rewritable codes into the run time area in F000 for ESCD & DMI support.
11h	Reserved

POST Code (Hex)	POST Routine Description
12h	Use walking 1's algorithm to check out interface in CMOS circuitry. Also set real-time clock power status, and then check for override.
13h	Reserved
14h	Program chipset default values into chipset. Chipset default values are MODBINable by OEM customers.
15h	Reserved
16h	Initial onboard clock generator if Early_Init_Onboard_Generator is defined. See also POST 26h.
17h	Reserved
18h	Detect CPU information including brand, SMI type (Cyrix or Intel) and CPU level (586 or 686).
19h	Reserved
1Ah	Reserved
1Bh	Initial interrupts vector table. If no special specified, all H/W interrupts are directed to SPURIOUS_INT_HDLR & S/W interrupts to SPURIOUS_soft_HDLR.
1Ch	Reserved
1Dh	Initial EARLY_PM_INIT switch.
1Eh	Reserved
1Fh	Load keyboard matrix (notebook platform)
20h	Reserved
21h	HPM initialization (notebook platform)
22h	Reserved
23h	<ol style="list-style-type: none"> 1 Check validity of RTC value: e.g. a value of 5Ah is an invalid value for RTC minute. 2 Load CMOS settings into BIOS stack. If CMOS checksum fails, use default value instead.
24h	Prepare BIOS resource map for PCI & PnP use. If ESCD is valid, take into consideration of the ESCD's legacy information.
25h	<p>Early PCI Initialization:</p> <ul style="list-style-type: none"> q Enumerate PCI bus number q Assign memory & I/O resource q Search for a valid VGA device & VGA BIOS, and put it into C000:0
26h	<ol style="list-style-type: none"> 1 If Early_Init_Onboard_Generator is not defined Onboard clock generator initialization. Disable respective clock resource to empty PCI & DIMM slots. 2 Init onboard PWM 3 Init onboard H/W monitor devices
27h	Initialize INT 09 buffer
28h	Reserved
29h	<ol style="list-style-type: none"> 1 Program CPU internal MTRR (P6 & PII) for 0-640K memory address. 2 Initialize the APIC for Pentium class CPU. 3 Program early chipset according to CMOS setup. Example: onboard IDE controller. Measure CPU speed.
2Ah	Reserved
2Bh	Invoke Video BIOS
2Ch	Reserved

POST Code (Hex)	POST Routine Description
2Dh	<ol style="list-style-type: none"> 1 Initialize double-byte language font (Optional) 2 Put information on screen display, including Award title, CPU type, CPU speed, full screen logo.
2Eh	Reserved
2Fh	Reserved
30h	Reserved
31h	Reserved
32h	Reserved
33h	Reset keyboard if Early_Reset_KB is defined e.g. Winbond 977 series Super I/O chips. See also POST 63h.
34h	Reserved
35h	Test DMA Channel 0
36h	Reserved
37h	Test DMA Channel 1
38h	Reserved
39h	Test DMA page registers
3Ah	Reserved
3Bh	Reserved
3Ch	Test 8254
3Dh	Reserved
3Eh	Test 8259 interrupt mask bits for channel 1
3Fh	Reserved
40h	Test 8259 interrupt mask bits for channel 2
41h	Reserved
42h	Reserved
43h	Test 8259 functionality
44h	Reserved
45h	Reserved
46h	Reserved
47h	Initialize EISA slot
48h	Reserved
49h	<ol style="list-style-type: none"> 1 Calculate total memory by testing the last double word of each 64K page. 2 Program write allocation for AMD K5 CPU.
4Ah	Reserved
4Bh	Reserved

Online Support Information

This section describes online technical support services available to help you repair the desktop computer.

If you are a distributor, dealer, ASP or TPM, please refer your technical queries to your local Acer branch office. Acer Branch Offices and Regional Business Units may access our website at <http://global.acer.com/support/index>. However some information sources will require a user ID and password. These can be obtained directly from Acer CSD Taiwan.

Acer's Website offers you convenient and valuable support resources whenever you need them.

In the Support & Downloads tab you can download information materials for all of Acer notebook, desktop and server models including:

- q Service guides for all models
- q User's manuals
- q Training materials
- q BIOS updates
- q Software utilities
- q Spare parts lists
- q Technical Announcement Bulletins (TABs)

For these purposes, we have included an Acrobat File to facilitate a hassle-free downloading of our technical materials.

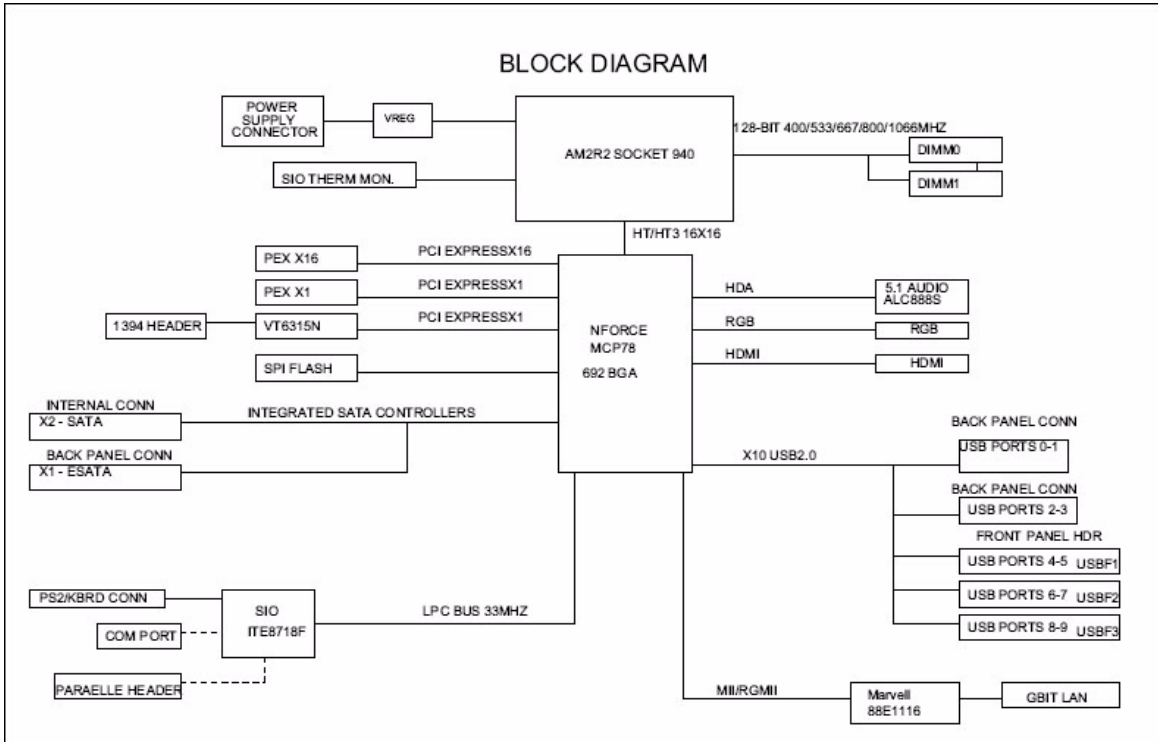

The following are also available in the Support & Downloads tab:

- q Detailed information on Acer's International Traveler's Warranty (ITW)
- q Returned material authorization procedures
- q An overview of all the support services we offer, accompanied by a list of telephone, fax, and email contacts for all your technical queries.

We are always looking for ways to optimize and improve our services, so if you have any suggestions or comments, please do not hesitate to communicate these to us.

FRU (Field Replaceable Unit) List

This chapter offers the FRU (Field Replaceable Unit) list in global configuration of the Aspire X1300/X1301 desktop computer. Refer to this chapter whenever ordering the parts to repair or for RMA (Return Merchandise Authorization).

NOTES:

- When ordering FRU parts, check the most up-to-date information available on your regional web or channel. For whatever reasons a part number is changed, it will NOT be noted on the printed Service Guide. For Acer authorized service providers, your Acer office may have a different part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for service.
- To scrap or to return the defective parts, follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.
- This document will be updated as more information about the FRU list becomes available.

Technical Specifications

This section provides technical specifications for the system.

Processor

AMD Athlon Processor

Item	Specification			
Type	AMD Athlon			
Model number	LE-1600	LE-1620	LE-1640	1660
Frequency (MHz)	2200	2400	2600	2800
L2 cache size (KB)	1024	1024	1024	—
HyperTransport (MHz)	2000	2000	2000	—
Socket type	AM2	AM2	AM2	AM2
Stepping	F3	F3	G2	—
Manufacturing tech (CMOS)	90 nm SOI	90 nm SOI	90 nm SOI	—
Wattage (W)	45	45	45	—
System bus (MHz)	2000	2000	—	—

AMD Athlon X2 Dual-Core Processor

Item	Specification		
Type	AMD Athlon X2 Dual-Core		
Model number	BE-2300	BE-2350	BE-2400
Frequency (MHz)	1900	2100	2300
L2 cache size (KB)	512	512	512
HyperTransport (MHz)	1000	1000	1000
Socket type	AM2	AM2	AM2
Stepping	G1	G1	G2
Manufacturing tech (CMOS)	65 nm SOI	65 nm SOI	65 nm SOI
Wattage (W)	45	45	45
System bus (MHz)	2000	2000	2000

AMD Athlon X2 Dual-Core Processor

Item	Specification							
Type	AMD Athlon X2 Dual-Core							
Model number	4850e	4200+	4400+	4600+	4800+	5000+	5200+	5600+
Frequency (MHz)	2100	2200	2300	2400	2500	2600	2700	2800
L2 cache size (KB)	512	512	512	512	512	512	512	1024
HyperTransport (MHz)	—	2000	2000	1000	2000	2000	2000	2000
Socket type	AM2	AM2	AM2	AM2	AM2	AM2	AM2	AM2
Stepping	G2	—	—	G2	G2	—	G2	F3
Manufacturing tech (CMOS)	65 nm SOI	65 nm SOI	65 nm SOI	65 nm SOI	65 nm SOI	65 nm SOI	65 nm SOI	90 nm SOI
Wattage (W)	45	65	65	65	65	65	65	89
System bus (MHz)	2000	2000	2000	2000	2000	2000	2000	2000

AMD Phenom X3 Triple-Core Processor

Item	Specification					
Type	AMD Phenom X3 Triple-Core					
Model number	8400	8450	8600	8650	8700	8750
Frequency (MHz)	2100	2100	2300	2300	—	2400
L2 cache size (KB)	512	512	512	512	—	512
HyperTransport (MHz)	1800	1800	1800	1800	—	1800
Socket type	AM2+	AM2+	AM2+	AM2	AM2	AM2
Stepping	B2	B3	B2	G2	—	B3
Manufacturing tech (CMOS)	65 nm	65 nm	65 nm	65 nm SOI	—	65 nm
Wattage (W)	95	95	95	95	—	95
System bus (MHz)	3600	3600	3600	3600	—	3600

AMD Phenom X4 Quad-Core Processor

Item	Specification						
Type	AMD Phenom X4 Quad-Core						
Model number	9100e	9150e	9500	9550	9600	9650	9750
Frequency (MHz)	1800	—	2200	2200	2300	2300	2400
L2 cache size (KB)	512	—	512	512	512	512	512
HyperTransport (MHz)	1600	—	1800	1800	1800	1800	1800
Socket type	AM2+	AM2+	AM2+	AM2+	AM2+	AM2+	AM2+
Stepping	B2	—	B2	B3	B3	B3	B3
Manufacturing tech (CMOS)	65 nm	—	65 nm	65 nm SOI	65 nm SOI	65 nm	65 nm
Wattage (W)	65	—	95	95	95	95	95
System bus (MHz)	3200	—	3600	3600	3600	3600	3600

AMD Sempron Processor

Item	Specification	
Type	AMD Sempron	
Model number	LE-1250	LE-1300
Frequency (MHz)	2200	2300
L2 cache size (KB)	512	512
HyperTransport (MHz)	800	800
Socket type	AM2	AM2
Stepping	G2	G2
Manufacturing tech (CMOS)	65 nm SOI	65 nm SOI
Wattage (W)	45	45
System bus (MHz)	1600	—

System Board Major Chips

Item	Specification
System core logic	NVIDIA NForce MCP78 692 BGA
Storage controller	NVIDIA NForce MCP78 692 BGA
Video controller	NVIDIA NForce MCP78 692 BGA
PCI controller	NVIDIA NForce MCP78 692 BGA
LAN controller	NVIDIA NForce MCP78 692 BGA + Marvell 88E1116

System Memory

Item	Specification				
Memory type	DDR2-667/800 registered DIMM				
Organization	ECC				
Pin count	240				
DIMM sockets	2				
DIMM size	512 MB, 1 GB, or 2 GB				
Minimum memory	512 MB				
Maximum memory	2 GB				
Vendor	Unifosa	Promos	Hynix	Micron	Transcend
Model name	GU341G0AJE PR6C2C4CE	V916764K24Q CFW-F5	HYMP112U64 CP8-Y5	MT16HTF256 64AY-667E1	JM367Q643A -6
Type	DDR2	DDR2	DDR2	DDR2	DDR2
DIMM size		512 MB	2 GB	2 GB	512 MB
DIMM speed (MHz)	667	667	667	667	667
	—	PC2-5300	PC-5400	—	—
ECC or non-ECC	—	Non-ECC	Non-ECC	Non-ECC	ECC
Pin	240				

System BIOS

Item	Specification
BIOS vendor	Pheonix
BIOS version	DA78LD02
SMBIOS version	2.4

PCI Interface

Item	Specification
PCI Express controller	NVIDIA NForce MCP78 692 BGA
Number of slots	<ul style="list-style-type: none">• One PCI Express x16 bus slots• One PCI Express x 1 slot

Network Interface

Item	Specification
LAN controller	NVIDIA NForce MCP78 692 BGA + Marvell 88E1116
Supports LAN protocol	10/100/1000 Mbps
LAN connector type	RJ45

SATA Interface

Item	Specification
SAS controller	Embedded SATA controller
Connectors	<ul style="list-style-type: none">• Two SATA ports• One eSATA port

Keyboard and Input Devices

Item	Specification
Controller	NVIDIA NForce MCP78 692 BGA + SIO ITE8718F

Optical Drive

BD-R

Item	Specification	
Vendor	HLDS	
Model name	GGW-H20N	GGC-H20N
Drive type	BD-R	BD-R

BD-R

Item	Specification	
Write Speed	BD-R(SL) 2x, 4x CLV BD-R(DL)/BD-RE(SL/DL) 2x CLV DVD-R 2x, 4x CLV, 8x ZCLV DVD-R(DL) 2x, 4x CLV DVD-RW 2x, 4x CLV, 6x ZCLV DVD+R 2.4x, 4x CLV, 8x ZCLV DVD+R(DL) 2.4x , 4x CLV DVD+RW 2.4x, 4x, 6x CLV, 8x ZCLV CD-R 10x CLV, 16x CLV CD-RW 4x, 10x, 16x CLV	DVD-RAM 5x PCAV DVD+R(DL) 4x CLV DVD+RW 8x ZCLV DVD+R 16x PCAV DVD-R(DL) 4x CLV DVD-RW 6x CLV DVD-R 16x PCAV CD-RW 24x ZCLV CD-R 40x PCAV
